

WHAT monifold.ai IS

One intelligence layer for business growth

monifold.ai connects:

- **Business Context**
- **Market Signals**
- **Customer & Sales Data**
- **Marketing Performance**
- **Physical Activity**

And turns them into:

Clear recommendations.

THE monifold.ai CONTEXT STACK

Four types of information

Business Inputs

Product, price,
location, budget
and goals.

Connected Data

Business, sales,
customer and
marketing systems.

External Signals

Market, competitors,
demand and
seasonality.

Physical Signals

Footfall and
location activity.

Customer-controlled by design

The customer keeps control of its data.

USE CASE: EXISTING BUSINESS

Retail business with 20 stores

monifold.ai connects its Context Stack.

It finds:

Footfall	Sales	Conversion
+27%	+5%	22%→18%

Insight

Marketing brought more visitors.
But the stores converted fewer of them.

Action

Fix conversion before increasing
marketing spend.

GO-TO-MARKET

Sell the decision before selling the software

01 - Diagnose

Understand the business.

02 - Find the gap

Identify a missed opportunity or wasted spend.

03 - Run a paid pilot

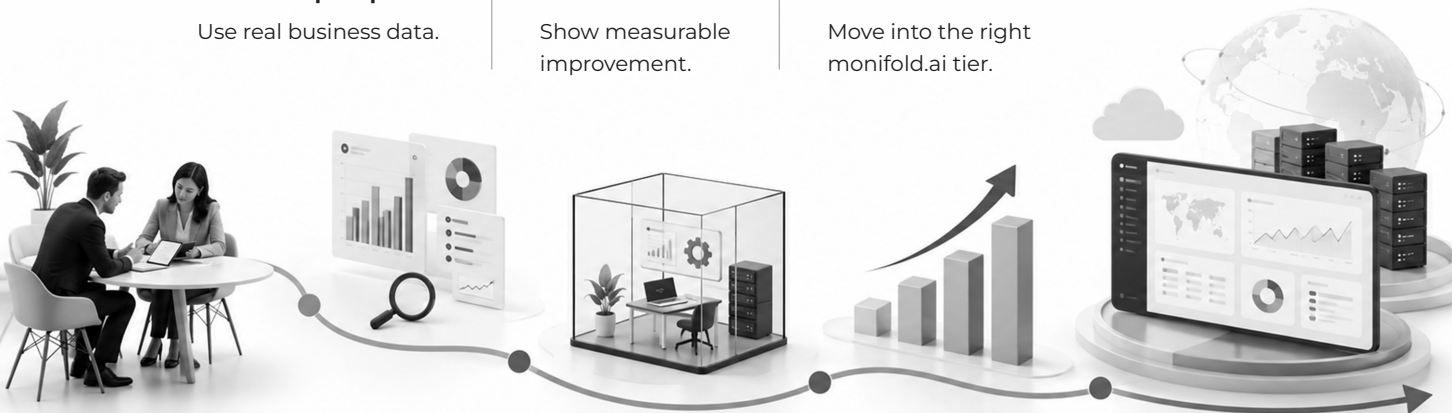

Use real business data.

04 - Prove value

Show measurable improvement.

05 - Subscribe

Move into the right monifold.ai tier.
